ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: October 5, 2000 / 1545

Site Contact(s): Bob Cathel, B776/777, 966-6880

Regulatory Contact: James Hindman, 692-3345

Agency: CDPHE

Purpose of Contact: Notification of planned entry into Size Reduction Vault (SRV) in B776/room 146 and subsequent verification of physically empty status of three tanks identified in the Mixed Residue Tank Plan (Plan).

Discussion

I discussed with Mr. Hindman the planned entry into the SRV and proposed activities. One of these activities includes a verification that three tanks (Ball Mill Washer, Collection Pan and Annular Tank) are physically empty in accordance with the Plan. I suggested to Mr. Hindman that the Ball Mill Washer and Collection Pan will be visually verified and asked Mr. Hindman to consider an audible verification (i.e., tapping) for the Annular Tank. Mr. Hindman agreed, that for this one case, this would be an acceptable approach. If the results indicate no liquids are present, then this tank (not the tank "system") will be considered physically empty in accordance with the Plan.
